Services for your organisation

Training helps people use their software for everyday work tasks. It covers screen readers and magnification, dictation, reading and writing tools, mind mapping, workplace productivity and AI tools.

We also provide software consultation and set-up, website and internal-system accessibility audits, and visual impairment awareness sessions.

Training is available remotely across the UK, or on site by arrangement. For several learners, tell us their goals and the number of people involved so we can discuss a suitable format.

Buying training through YPO

AAT Solutions Ltd is an approved supplier on YPO's 999 Training Dynamic Purchasing System (DPS). Visual impairment awareness training is available under YPO's Equality and Diversity category (20). Assistive technology training falls under IT (22).

Eligible public-sector organisations use YPO's further competition process to award training requirements. Contact HRSolutions@ypo.co.uk for procurement guidance or contact us to discuss your training needs. View YPO's training purchasing route.

Arranging training

1. Send the software names, the work tasks the learner wants to complete, preferred delivery arrangements and any recommended training hours. Tell us who should receive the quote.
2. Review our written quote, usually provided within two working days. It sets out the scope, cost, booking, payment and cancellation arrangements before you agree. A free phone consultation is available on request.
3. Agree the sessions. We confirm the trainer and session arrangements before training begins. Training booked against an Access to Work grant needs the required funding approval.

The standard booking is a three-hour half-day per software package. Shorter sessions for an individual package are available on request. Each package has dedicated sessions and includes two weeks of follow-up support.

Information for purchasing teams

- Professional indemnity and public liability insurance, with cover up to £5 million each. Certificate period: 20 August 2026 to 19 August 2027. Current insurance evidence is available on request.
- Documented client consent, lone working and safe delivery procedures are available on request.
- Safeguarding and DBS information is available on request where relevant to the work.
- Email your organisation's supplier-registration form or onboarding instructions to info@aatsolutions.uk with the required documents and deadline. We complete the relevant sections and supply supporting evidence. Your organisation's approval process still applies.
- Bank details are shared directly during supplier onboarding.
- AAT Solutions Ltd is Cyber Essentials certified across the whole organisation.

Verify our Cyber Essentials certificate on the BlockMark Registry

Member of the British Assistive Technology Association (BATA). Read about our BATA membership.

ICO Data Protection Essentials: AAT Solutions Ltd completed the training and organisational self-assessment on 31 October 2026. Our organisation certificate is valid until 31 October 2027 and available on request. Completion is not ICO certification of compliance with data protection law.

Supporting information is available online. Read our training quality assurance report and voluntary modern slavery statement.

Practical expertise

Founder Aj Ahmed is blind and has relied on screen-reading technology every working day for more than thirty years. His career includes assistive technology training, software testing, product management and technical support, including work with Dolphin.

His software certifications include JAWS, ZoomText, SuperNova for Trainers, Guide Connect for Trainers and EasyReader for Educators. This experience informs training and accessibility testing.

What an accessibility audit provides

You receive a prioritised written report with step-by-step guidance. A call is available on request, and follow-up and retesting are agreed in your quote.

The agreed scope identifies what will be assessed. An audit is an expert assessment, not legal certification or a guarantee of compliance.

Sharing information

Please share training recommendations rather than a full medical or assessment report. Medical records and diagnoses are not needed to prepare a training quote. A quote does not confirm Access to Work eligibility or funding.

AAT Solutions Ltd is the data controller for personal information collected through its website. Our privacy policy explains how enquiry information is used and how to contact us about it.
